

# Rappid K

## Content

- Soluble Potash ( $K_2O$ ) 17%
- Available Phosphate ( $P_2O_5$ ) 16%

## Application & positioning

- Consult the label for the application on a specific crop.
- 1 – 3 qt/ac as a foliar spray.
- Compatible with many agrochemicals.

## Benefits of Rappid K

- Polyphosphate that contains potassium.
- Encourages root growth.
- Enhances availability of soil phosphate for plants.
- Mobile in soil while in the soil solution .
- Enhances and supports the distribution of energy through the plant.
- Higher energy leads to more efficient resistance in plants to biotic and abiotic stresses.
- Rappid K is a highly efficient phosphate source in high pH soils.
- Polyphosphate is slowly hydrolysed to an orthophosphate – more P over a longer time.
- Ideal to apply during the fruit development phase of plants.
